Recall Description
Federal Motor Vehicle Safety Standard (FMVSS) No. 571.111 S6.2.6 requires that "The rear visibility system default to the rearview image being visible and meet the requirements of FMVSS No. 571.111 S6.2.1 (field of view) and S6.2.2 (image size) at the beginning of each backing event, regardless of any modifications to the field of view that the driver had previously selected..." and apply to other markets via direct reference to FMVSS or are implied via free trade agreements. Vehicles with suspect radio software may not display the rearview image during a backing event under certain conditions

Remedy
FCA US will conduct a voluntary safety recall on all affected vehicles to update the radio software. The vehicle population will be managed between 2 FCA US campaign ID numbers, 66B and 79B. All customers known to have a software level which includes the remedy will be assigned to 79B. The balance of customers will be assigned to 66B.
